Office of the National Coordinator for Health Information Technology §170.315(b)(10) – EHI Export Documentation

Product Name: Proven Software, Inc
Software Version: Proven EMR/EHR v2
Prepared For: ONC Health IT Certification Program
Certification Criterion: §170.315(b)(10) Electronic Health Information Export
ONC-Authorized Certification: Drummond Group-https://www.drummondgroup.com
Certified Health IT Product List (CHPL) ID: 15.04.04.3273.Prov.02.00.0.260813
Document Version: 1.0
Effective Date: 08/13/2026

1. Capability Statement

Proven Software, Inc enables the export of electronic health information (EHI) for:

- (i)(A) A single patient
- (i)(B) A population of patients

The system exports all EHI stored at the time of export, including but not limited to data defined in the United States Core Data for Interoperability (USCDI).

2. Scope of Data Included

EHI Exports include data elements defined by the United States Core Data for Interoperability (USCDI) and additional health information maintained by Proven Software, such as:

- Patient demographics and identifiers
- Clinical notes and documentation
- Problems, allergies, medications, and immunizations
- Care plans, encounters, and observations
- Attachments, uploaded files, and billing data

3. Export Format and Structure

Proven Software exports data in CSV and PDF formats:

- CSV (Comma-Separated Values): Provides structured data suitable for flat file import, analysis, or integration with external systems.
- PDF: Provides human-readable reports designed for provider and patient review.

 © 2026 Proven Software. All Rights Reserved

There is a potential of sixty-four csv files that will be exported as a downloadable zip file. Once unzipped the naming convention of the CSV file is by the type of data. (e.g., Medications.csv, Encounters.csv). There is also a documents folder and a readme.txt file.

4. End-User Workflow

4.1 Prerequisites and Access Requirements

EHI Exports are available to users with administrative privileges. Before initiating an export, users must have:

• Valid Proven Software credentials with export permissions
• Sufficient storage space for export files
• Internet access for download or secure transfer

4.2 Single Patient Export

- Navigate to: System → Create Export → [no] full export
- Select: “search for patientx”, select valid patient name
- Click Start Export
- Auto download via secure link e.g. ehi-export-patient-649-20260616-135545

4.3 Population Export

1. Navigate to: System → Create Export → [yes] full export
2. Click Start Export
3. Auto download via secure link e.g. ehi-export-full-20260716-141340

4.4 Limitation and Notes

- Population export is not recommended for an end-user and requires special permission given only to the IT Department. Full fill export requires a service request to provensoftware.org, as large exports will require extended processing time.
- In some cases, data accuracy and completeness depend on the user’s permissions and system configuration.
- Archived data stored outside of the active database is not included in the export.
- Exported data is intended for informational and portability purposes only.
- Access and export rights are subject to HIPAA and organizational policies.

5. Support and Contact Information

For assistance or additional information regarding Proven Software's EHI Export functionality:

- Website: [www.provensoftware.com]
- Email: [support@provensoftware.com]

6. Data Scope (EHI Coverage)

The export includes **all EHI maintained by the system**, including: **USCDI-Aligned Data Classes**

USCDI V3 Data Class	EHI Export CSV file names	Category
Problems	PatientDiagnoses	Problems/Diagnoses

United States Core Data for Interoperability (USCDI) | Interoperability Standards Platform (ISP)

USCDI v3 Summary of Data Classes and Data Elements

Allergies and Intolerances
- Substance (Medication)
- Substance (Drug Class)
- Reaction

Assessment and Plan of Treatment
- Assessment and Plan of Treatment
- SDOH Assessment

Care Team Member(s)
- Care Team Member Name
- Care Team Member Identifier
- Care Team Member Role
- Care Team Member Location
- Care Team Member Telecom

Clinical Notes
- Consultation Note
- Discharge Summary Note
- History & Physical
- Procedure Note
- Progress Note

Clinical Tests
- Clinical Test
- Clinical Test Result/Report

Diagnostic Imaging
- Diagnostic Imaging Test
- Diagnostic Imaging Report

Encounter Information
- Encounter Type
- Encounter Diagnosis
- Encounter Time
- Encounter Location
- Encounter Disposition

Goals
- Patient Goals
- SDOH Goals

Health Insurance Information
- Coverage Status
- Coverage Type
- Relationship to Subscriber
- Member Identifier
- Subscriber Identifier
- Group Number
- Payer Identifier

Health Status/Assessments
- Health Concerns
- Functional Status
- Disability Status
- Mental/Cognitive Status
- Pregnancy Status
- Smoking Status

Immunizations
- Immunizations

Laboratory
- Tests
- Values/Results
- Specimen Type
- Result Status

Medications
- Medications
- Dose
- Dose Unit of Measure
- Indication
- Fill Status

Patient Demographics/ Information
- First Name
- Last Name
- Middle Name (Including middle initial)
- Name Suffix
- Previous Name
- Date of Birth
- Date of Death
- Race
- Ethnicity
- Tribal Affiliation
- Sex
- Sexual Orientation
- Gender Identity
- Preferred Language
- Current Address
- Previous Address
- Phone Number
- Phone Number Type
- Email Address
- Related Person's Name
- Related Person's Relationship
- Occupation
- Occupation Industry

Problems
- Problems
- SDOH Problems/Health Concerns
- Date of Diagnosis
- Date of Resolution

Procedures
- Procedures
- SDOH Interventions
- Reason for Referral

Provenance
- Author Organization
- Author Time Stamp

Unique Device Identifier(s) for a Patient's Implantable Device(s)
- Unique Device Identifier(s) for a patient's implantable device(s)

Vital Signs
- Systolic Blood Pressure
- Diastolic Blood Pressure
- Heart Rate
- Respiratory Rate
- Body Temperature
- Body Height
- Body Weight
- Pulse Oximetry
- Inhaled Oxygen Concentration
- BMI Percentile (2 - 20 years)
- Weight-for-length Percentile (Birth - 24 Months)
- Head Occipital-frontal Circumference Percentile (Birth- 36 Months)
